The Boston Area Diabetes Endocrinology Research Center
now accepting
Pilot and Feasibility Research Grant Award Applications
for studies of Diabetes Mellitus and Its Complications

The Boston Area Diabetes Endocrinology Research Center is funded by the National Institute of Diabetes and Digestive Diseases (NIDDK) to support research in Diabetes and its complications. Research grants up to the amount of $30,000 will be awarded for meritorious proposals from candidates whose eligibility is defined by one or more of three criteria:

1. Junior faculty without past or current NIH support to conduct Diabetes research.

2. Established non-Diabetes researchers who have an innovative idea relevant to Diabetes.

3. Established Diabetes investigators who have an innovative idea/approach relevant to Diabetes that represents a distinct departure from their established line of investigation.

It is anticipated that up to four meritorious applications will be funded.

Letters of Intent and abstract due October 5, 2012
If proposal accepted,
Applications due by November 9, 2012

If you qualify based on one of the three criteria listed above, send a one-page letter briefly stating why and what your research program will encompass along with an abstract page in ms word via email. Please note. On the letter to include your name, degree, title and mailing address. If such is deemed compatible with the goals of the BADERC, instructions for the preparation of a five-page application for a Pilot and Feasibility Research Grant Award will be forwarded to you. The deadline for the Grant application will be November 9, 2012. Funding will be effective April 1, 2011.

Please send Letters of Intent and abstract page (email) to
Prendable@molbio.mgh.harvard.edu
