Congratulations to the Class of 2010!

A list of graduates can be found on our graduation site at http://hst.mit.edu/go/graduation.

23rd Annual HST Forum
On April 15 HST held its 23rd Annual Forum. This year's Forum was an extraordinary event with more than 200 individuals who attended the poster session, talk, awards, and reception.

A career in bioengineering
Christopher Chen, MD '99, PhD (MEMP '97) is the Skirkanich Professor of Innovation in Bioengineering at the University of Pennsylvania, where he directs the Tissue Microfabrication Laboratory. His fascination with how cells are able to sense and respond to structural and mechanical cues in their environment arose from a journey which began when he was an undergraduate at Harvard, took him through both the MEMP and HST MD programs, and led to the research which he continues to pursue.

A man of many hats
Professor Richard Mitchell, MD, PhD, the Lawrence J. Henderson Associate Professor of Pathology, HMS, BWH, and HST, and Associate Master of the London Society, shares his thoughts on research, teaching, and life in HST.

Admissions update
The MD and Graduate Admissions Committees report on the selection on the next incoming class.
