Update on the HST Clinical Investigator Training Program
The two-year Clinical Investigator Training Program was founded in 1993 with the goal of training physicians from a variety of clinical disciplines in the techniques and processes utilized in patient-oriented research.

From operating rooms to board rooms
After years as a cardiac surgeon, HST alumnus Ralph de la Torre, MD '92, SM '92 switched gears and became CEO at Caritas Christi Health Care. Dr. de la Torre reflects on the strategies that have brought him success in his varied career.

Leading the way to success
Professor Fiona Murray, Associate Professor at Sloan School of Management and HST-Affiliated faculty member, defines achieving success in her career as "molding MIT into the center of leading research and education for scientific entrepreneurship which particularly meets the needs of its students and faculty."

The best of both worlds — Combining medicine and an MBA
Sun Min You recounts how her interest in science, her desire to help people, and experiences at Massachusetts General Hospital and Children's Hospital led her to pursue an MBA and a Masters of Science through HST's Biomedical Enterprise Program.
