## Request to Schedule MEMP Oral Qualifying Exam (OQE)

**Eligibility:** Must have passed the TQE or met the exceptions as outlined on the HST website.

**Purpose:** The purpose of the OQE is to evaluate whether the student can integrate information from diverse sources into a well thought out and coherent research proposal - a skill essential for successful scholarship. The ability to defend this proposal during an oral presentation is a central part of the qualifying process. The qualifying exam explores students' ability to formulate coherent research questions and to explain the relevance of their proposed research to clinical medicine. In addition, students should be prepared to demonstrate how they think on their feet.

**Instructions:**

- Review guidelines/deadlines for research proposal and advisor letter as described on HST website
- Meet with QE Chair to discuss format and expectations for the exam
- Submit signed scheduling form to the HST Academic Office (E25-518 or tanderso@mit.edu) by **March 1** (for Spring exams) or **November 1** (for January exams).
