

HST SEMI-ANNUAL PhD STUDENT PROGRESS REVIEW

PAGE 1: INSTRUCTIONS

The purpose of this progress review is to ensure that PhD students and their research supervisors are communicating regularly regarding the student's progress on thesis research and the student's overall professional development. Completion of the review during each regular term (fall and spring) is mandatory for all PhD students beginning in the third year of registration. **Students conducting thesis research must submit page 4 of this form in order to receive academic credit for HST.ThG.**

Please note that except for the last page, only the student and their research supervisor will see the completed forms.

Please provide a copy of the form for your supervisor to complete independently. One copy is to be filled out by the student, the other by the research supervisor. Feel free to use additional pages if you need more space. After both are completed, the student and the research supervisor should meet to compare and discuss the results. This is the opportunity for both parties to get a better sense of progress on the project, of the student's development, and of the student/supervisor working relationship, as well as to plan for future progress.

The research supervisor will assign a grade of satisfactory or unsatisfactory for thesis research, directly on the review form. ***The student and the research supervisor each sign the review and send page 4 to Traci Anderson in E25-518 by the last day of classes at MIT.*** The student should retain copies of the two review forms while the research supervisor may wish to as well.

The review covers the following topics:

Questions 1:	Review of Past Progress
Questions 2 and 3:	Setting of Future Goals
Question 4:	Rate of Progress
Question 5:	Student's Professional Development
Question 6:	Frequency of Interaction
Question 7:	Funding Status
